Objective

To contribute my skills and knowledge as a proactive team member in an organization, continuously learn and grow, and deliver high-quality results. Seeking opportunities to work on challenging projects with committed professionals while contributing to the growth of the organization.

Projects

- Hospital Management System Demo

Developed a web-based system to manage patient records, appointments, and doctor assignments efficiently. Implemented a responsive front-end using HTML, CSS, JS, and JSP, with a secure Java backend connected to MySQL. Enabled full CRUD operations for seamless hospital record management, ensuring accuracy and integrity. Enhanced resource efficiency and improved overall patient care.

- I Notebook - Personal Note Management Application Demo

Designed a digital note-taking application that enables users to securely store, organize, update, and delete notes online. The project provides a centralized, user-friendly platform aimed at enhancing organization for students and professionals, helping them efficiently manage both academic and personal information.

Education

2020 - 2024	B-Tech(C.S.E) at **MNR college of engineering and technology**	(GPA: 7.07/10.0))
2017 - 2020	Intermediate (MPC) at**Narayana junior college**	(Marks:645/1000)
